

# ACEC Ohio Survey

## Feedback Needed

Good afternoon ACEC Ohio Members,

We are looking for feedback for our Workforce Development Committee on opportunities to promote the industry to students from elementary to university. **Please click [here](#) to take the survey now!**

We also want to highlight a volunteer opportunity for an organization the Workforce Development Committee has been working with, Future City. See below a message from Future City:

One of the main objectives of the Future City program is to encourage STEM education leading to a career in a STEM-related field, and working with an engineer on their project is a step in that direction. In addition to meeting with the team at least once before the competition on 1/11/25 in Columbus (location TBD), and we prefer that the mentor is available on the day of the competition (or the 1/25/25 rain date) to accompany the team. We suggest scheduling a call between the educator and mentor for introductions and let them decide on the dates and frequency of meetings with the team. The other dates that should be mentioned are: Teacher Registration deadline 10/31/24, and Project Essays are due 12/13/24.
