Upcoming 2024 Salary, Benefits & Business Practices Survey

Mark your calendars! On Monday, September 23, you will receive an email invitation to participate in the 2024 Salary, Benefits & Business Practices Survey, administered by The Owens Group. This survey is a valuable resource exclusively available through ACEC Ohio, gathering the most current data from engineering companies across Ohio—information that you won't find anywhere else.

The 2024 survey will include comprehensive sections on salary, benefits, and business practices. Conducted every three years, the business practices section, will cover crucial topics such as owner transition, business valuation, utilization rates, backlog, and average days for receivables.

We highly encourage your participation in this year's survey. The more data collected, the more detailed and beneficial the final report will be for all members. The survey will remain open until October 18, 2024, with results available in early November.

Your input is vital to ensuring the survey's accuracy and usefulness. Thank you for contributing to this important initiative!
