## Types of Projects\* Not Funded from State Bonds

---

Although the specifics of any proposed project must be evaluated, the types of projects listed below either lack express constitutional authority for state bond funding, or have traditionally been funded as part of long-standing pre-existing programs for which other funding is available:

- Operating expenses.
- Basic repair or maintenance projects.
- City, county, local government, or non-profit organization office facilities such as city halls and municipal buildings, unless a state agency is housed in the facility.
- Local community action and senior citizen centers, unless there is a specific higher education program nexus and benefit.
- Local infrastructure projects like water lines, sewer lines, wastewater treatment plants, solid waste facilities, or utility upgrades (see the Ohio Public Works Commission (OPWC) State Capital Improvement Program or the Ohio Water Development Authority for these types of projects.)
- Economic development projects such as industrial parks, multi-modal transportation facilities, commercial office space, community revitalization, etc. (see Department of Development programs like Third Frontier and Facilities Establishment Fund for these types of projects).
- Projects that are owned by or for the benefit of private companies and projects that are owned by or for the benefit of the federal government or not-for-profit entities (absent a long-term lease/use agreement or other interest granted to the State and appropriate mitigation of all federal tax law issues).
- Road projects, road signage, bridges, culverts, or inter-modal facilities. (see Ohio Department of Transportation (ODOT) and the OPWC programs for funding options).
- Local airports (see ODOT for alternative funding options).
- Transit Authorities.
- Police or fire stations, County sheriff offices.
- Local library improvements.
- Local social service agency facilities, unless done in conjunction with Behavioral Health, Developmental Disabilities, or another state agency.
- Capital projects for the use and benefit of private-for-profit organizations.
- Projects for private (non-state assisted) institutions of higher education unless that institution has a joint use agreement with a publicly funded higher education institution (see Ohio Higher Education Facilities Commission for funding of projects at private higher education institutions).
- Vehicles, boats, and short-lived equipment.
- Projects to create or improve assets that do not have a useful life of at least the length of the bonds issued to fund them (approximately 15 years, generally).
- Equipment-only projects for assets that do not have a useful life of at least the length of the bonds issued to fund them (approximately 15 years, generally).

*\* These examples are illustrative of the types of community projects that have traditionally not been funded in prior capital bills; this is not intended to represent an exhaustive list. The specifics of each proposed project must be evaluated on a case-by-case basis for state bond funding.*
